

Quality and Environmental Policy

- The Hubbell Scotland quality and environmental policy aims to achieve customer satisfaction by providing a range of competitive products and solutions for use in harsh and hazardous environments.
- These will be delivered both on time and in a fully functioning order. Our philosophy is to build quality into all aspects of our business relating to the design, development, manufacture and sale of luminaires, ballasts and control gear . Our commitment also extends to prevention of pollution, to compliance with applicable and other legislation.
- We will also continually review and improve the effectiveness of our Quality and Environmental Management System through teamwork and defined business objectives to ensure certification to the ISO9001, ISO14001, ATEX/IECEX and other standards applicable to products used in harsh and hazardous environments. This policy will be communicated to both internal, external customers and public.
