## Chalmit Technical Bulletin 07/01      Dated: 15.03.07

### Subject: Protecta Fluorescent Luminaire Suitable For Dust Only Applications

The Chalmit Protecta fluorescent luminaire suitable for "DUST" only environments is catalogued and branded with the catalogue reference of:

#### **PRGU/\*\*\*/BI**

The breakdown of this coding is as follows:

"PR" this reference designates the Protecta range.

"G" designates the body being manufactured from GRP. If the body were manufactured from stainless steel, this reference would be "S".

"U" designates being certified for dust only.

\*\*\* this covers the lamp range which is either single or twin 18W or 36W.

"BI" designates bi-pin lamps.

This catalogue reference was introduced in 2003 to correspond with new catalogue logic across the complete Chalmit range of products.  
This new logic is slightly different from that which is shown in the original certificate for this product range:

#### **Certificate No BAS02ATEX2180**

This bulletin should be accepted as confirmation that the product certified under this certificate number with the prefix "PRGD" is the same product listed and catalogued as "PRGU".

If any further clarification is required, please contact the undersigned or a member of the Technical Sales Department.

Yours Sincerely,

Ian MacLeod  
Technical Manager
