Recycling of Waste Batteries

Under the Waste Batteries and Accumulators Regulations 2009, Chalmit are a 'Producer' of 'Industrial' batteries and as such, are obliged to take back waste batteries supplied to an end user for proper disposal.

If any customer of Chalmit requires us to take back industrial batteries of our supply, they should contact the quality department at Chalmit to obtain the necessary authority. When this has been granted, the customer should make the necessary arrangements for the return of the industrial batteries to the Chalmit. From that point, Chalmit will take full responsibility for the correct disposal of the batteries.

Raymond Knox
